

Health & Safety Inspections

The Management of Health & Safety at Work Regulations require that companies have access to competent health & safety advice and one of the most effective ways for those involved in construction to access this is to have Quoin carry out regular site inspections and provide those on site with direct practical advice on real site health & safety issues.

Importantly, site inspections form part of the proactive site monitoring arrangements to regularly identify any shortcomings and areas of improvements before they result in any incident or accident on site.

The inspections and audits also provide reassurance and peace of mind to the Clients that the construction work on their projects is being carried out in accordance with best practice and legal requirements. This is an opportunity for Principal Contractors and Contractors to demonstrate that the safe systems of work and good health and safety standards are being followed on their sites.

At Quoin we provide independent site health and safety inspections and audit service.

Our inspections and audit service include undertaking a thorough site visit (generally unannounced) to identify any significant risks posed by current health and safety arrangements (and recognise good practices as well). This is combined with support and guidance to find solution to the identified issues. We also present a formal written report highlighting the identified issues where improvements may be required (with photos where necessary) and target completion time scales where applicable.

Our inspections and audit service is focused on supporting the site managers and supervisors helping them to understand the legislative and best practice requirements and assist them in rectifying any short comings in a practical and sensible manner.

Fees for this service are charged on a lump sum fee per inspection or are incorporated into an annual charge where Quoin is the company's "Retained Health & Safety Advisor".

Please contact us if you are interested in the site inspections and audit service or would like to know more about this service.
